Summary

Aspiring Software Engineering Intern with strong foundations in Data Structures and Algorithms, Computer Architecture, and Compiler Design. Interested in building scalable systems and contributing to high-performance engineering teams.

Projects

Blood Banking System

React JS, CSS, Spring Boot, MySQL

- Designed a blood bank management system for managing donor data and blood units.
- Built a user-friendly platform improving hospital-donor data accessibility.

Student Information System

Java

- Implemented a student record management system using linked lists.
- Supports attendance tracking, grading, and centralized student data.

Real-Time Vehicle Detection System

Python, Deep Learning, Computer Vision

- Developed a real-time vehicle detection system identifying cars, trucks, buses and motorcycles.
- Trained deep learning models using curated datasets and augmentation techniques.

CCTV Incident Analysis Agent

Python, Computer Vision

- Built an AI system to detect incidents in CCTV footage.
- Integrated automatic timeline and incident summary generation.

Education

KL University

2023 – 2027

B.Tech in Computer Science and Engineering, Vijayawada

CGPA: 9.16 / 10

Sri Chaitanya Educational Institution

2021 – 2023

Intermediate (MPC), Vijayawada

Percentage: 88%

Sri Chaitanya High School

2020 – 2021

SSC (10th Standard), Repalle

Percentage: 96%

Technical Skills

Programming: Java, Python, C

Technologies: React.js, Spring Boot, MySQL, Computer Vision

Concepts: Data Structures and Algorithms, Computer Architecture, Compiler Design

Tools: Git, GitHub
